SYNTEGON

PROCESSING & PACKAGING

Retrofit kit paper-ON-form.

Start your sustainability journey with paper-based materials for your existing horizontal flow wrappers.

Sustainability is more than another trend passing through.

To meet today's demands without compromising those of the future generations, corporations are called to transform and grow their business using sustainable resources, produce less waste and clear the path for a more sustainable future.

Invest in both your business and our environment and make sure to meet your customers' demands on sustainable packaging products: With Syntegon's **paper-ON-form** retrofit to cold-seal paper materials with your existing machine, you become a part of the journey.

YOUR BENEFITS

- Upgrade of your existing equipment to increase the sustainability of your packaging product
- Cold-seal paper-based materials without compromising on speed or product protection
- Meet your customers' demands and be up to speed with the sustainability standards of the future
- Years of comprehensive machine and service experience for best possible results

How to make the switch from conventional to sustainable packaging?

Sustainable journey path.

1

Analysis of your needs. Feasibility assessment of your product and packaging material.

2

Machinability tests with paper and your product.

3

Installation of upgrade on your existing packaging line.

4

On-site test production, based on your processes. You can produce samples for shelf life testing and transportation trials.

5

Vertical start-up on your packaging line.

SCOPE OF MODIFICATION

The increasing awareness of sustainability-oriented choices in our daily lives includes the packaging materials of the products we consume. As a business, it is essential to act on this call for more environment-friendly materials to meet your customers' demands. Be one step ahead with paper-based packaging products that position your business on the path to a more sustainable future. Without compromising on speed or product protection, your machine will run with state-of-the-art cold-seal technology.

Syntegon converts your existing equipment upgrading its forming and sealing components to produce perfectly seamed paper-based packaging products that convince with both look and feel. Successfully implemented for previous international brands, the **paper-ON-form** retrofit kit will expand your offer of paper-based solutions as well.

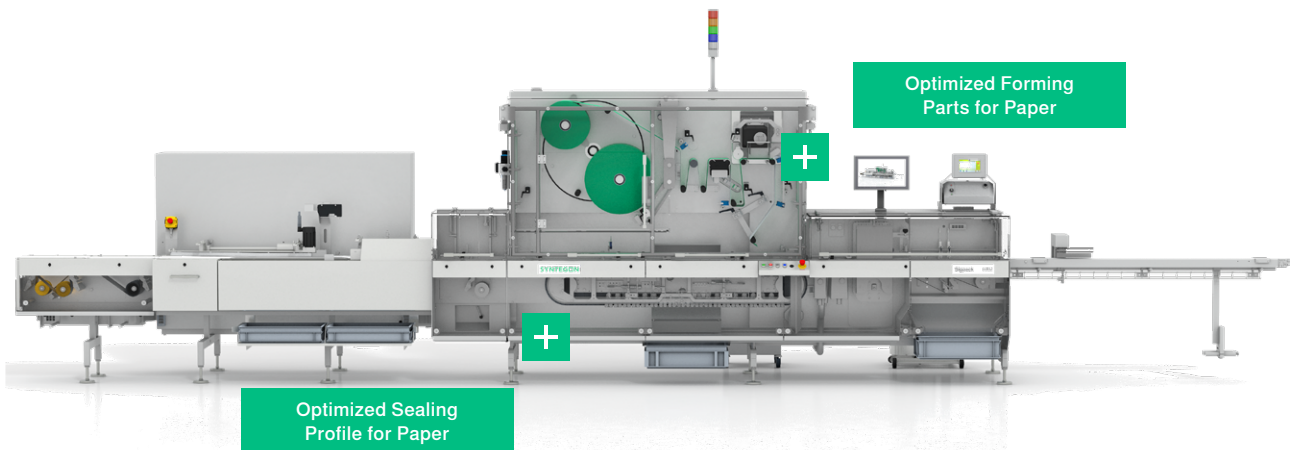

SUITABLE MACHINES
