MAIN FEATURES

Personalized landing page:

The dashboard automatically adapts to the user's role,
providing quick access to all relevant tools and informa-
tion.

Personal account preferences:

Manage your notification settings, view and update per-
sonal data, and easily access your Syntegon contacts.

Company administration:

Configure key organizational settings such as user roles
and responsibilities, user groups, budgets, cost centers,
purchase limitations, and account summaries.

Customer-specific machine overview:

View your installed base along with detailed machine
information. Machine images, names and descriptions
can be changed at any time.

Transparent product information:

Obtain real-time stock levels and price information as
well as detailed product descriptions.

Advanced search function:

Use text-based search and integrated image recognition
for instant parts identification.

Quote and order management:

Take full control of your quote process. Different users
or user groups can edit quotes before submitting them
to Syntegon. Convert accepted quotes into orders and
view detailed information for all active and past orders.

Service requests:

Request assistance or support from Syntegon. For easy
follow-up, all submitted requests are tracked and visible
on your support page.
