

## PRESS INFORMATION

### Syntegon launches Kliklok ACC (Advanced Carton Closer) for high speed carton sealing with high flexibility and outstanding precision

- Reliable and efficient processing with outputs of up to 200 cartons per minute
- Operational efficiency and accuracy because of positive carton control within the turning section
- Secured sealing and improved flexibility with the ability to handle large carton sizes
- Easy and intuitive operation with reduced maintenance
- Seamless integration into line solutions to secure high operational efficiency

Waiblingen (Germany), February 6, 2025. The new Kliklok ACC is designed to meet the customer requirements in reliable product packaging. As an efficient secondary packaging solution, the carton closer ensures high-quality results with minimal rejects, increases efficiency and reduces operating costs. Developed in close collaboration with customers, it is tailored to meet all industry needs. The result: outstanding carton quality, maximum flexibility, easy access, low maintenance and high speeds to meet changing production requirements.

The Kliklok ACC delivers advanced features that provide operators with efficient and safe packaging processes. These include servo-driven carton alignment and integrated controls, as well as tool-free changeover and the ability to process both cardboard and corrugated board. Built to meet diverse customer requirements, the Kliklok ACC is suitable for various customer layouts with cover left and cover right carton entry and exit options.

#### Reliable processing at high speed

With outputs of up to 200 cartons per minute, the carton closer can process a wide range of carton sizes and formats. The closer's safe and ergonomic design and easy access ensure efficient and reliable operation, even as production requirements change.

The Kliklok ACC can be used in a variety of food and non-food industries. With the positive turning section, cartons can be handled in all production environments, e.g. cold, wet, condensation etc. This feature offers flexibility, efficiency and protection of larger items during packaging.

To achieve the highest process efficiency, the Advanced Carton Erector (ACE) and the Kliklok ACC in combination with one of the automatic loading solutions from Syntegon, can easily be integrated into a complete line solution. The machines are seamlessly working together, creating synergies through a perfectly integrated line solution for topline cartoning. All components offer a harmonized control system with an intuitive human-machine interface and Industry 4.0 capabilities.

To secure high operational efficiency and low maintenance cost, Syntegon offers comprehensive service agreements for the Kliklok ACC and full line solutions.

## About Syntegon

Syntegon is pharmaceutical and food companies' strategic partner for processing and packaging technology. Its 6,300-strong workforce delivers seamless processes, innovative technologies, and sustainable solutions to both industries. Syntegon's integrated lines enable pharmaceutical companies to produce, process, fill, inspect, and package liquid and solid medicines, safely and in high quality. Food companies, in turn, count on Syntegon's flexible, reliable systems to produce and package confectionery as well as dry and frozen comestibles. Headquartered in the Stuttgart region, Germany, Syntegon can look back on more than 160 years of experience. In 2023, the company posted annual sales of 1.5 billion euros. With a global presence of more than 35 locations in almost 20 countries and a comprehensive service portfolio, Syntegon provides a platform for seamless processes for its customers. The company's 1,400 employees in research and development work on leading technologies every day – 2,100 patents and patent applications are proof of the processing and packaging expert innovative strength. By providing sustainable solutions, Syntegon enables the industry to switch to alternative packaging and resource-conserving production processes.
