

BOSCH

Invented for life

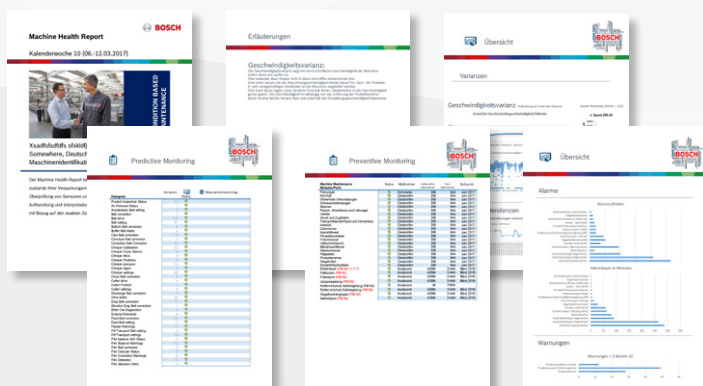

Stable machine health with Condition Monitoring Services

Condition Monitoring Solutions for
productivity and quality on a new level

Foresighted advice for continuous process improvement

A Condition Monitoring Solution from Bosch

Your early warning system thanks to expert advice

Condition Monitoring Services keep the performance of your production equipment stable. By combining data from the Condition Monitoring platform¹ with the know-how of our service experts, we provide you with recommendations on upcoming maintenance activities.

Detailed health reports

We remotely monitor your machine condition data to identify any deviations or required maintenance. You receive a regular machine health report so you are always up-to-date regarding the condition of your equipment. In case actions like a spare part change are required, you receive an immediate notification.

Continuous process improvement

In joint expert workshops, we develop your individual action plan for preventive maintenance. This way, you can continuously improve your processes, while reducing unplanned downtime and securing highest machine availability.

Customer Value

- ▶ Reliable planning
- ▶ Waste reduction
- ▶ Increased machine availability
- ▶ Less unplanned downtime and increased efficiency

Our Service Promise

- ▶ We monitor the status of your machines and the lifetime of components
- ▶ We identify and interpret condition deviations based on machine condition data
- ▶ We recommend maintenance actions to keep your machine performance at its best
- ▶ We provide service excellence by combining your machine expertise with the know-how of our data specialists
- ▶ Combine with Condition Monitoring platform¹
